Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 4, 5, and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Nishimura et al (US Patent 5,646,941).

With respect to claims 4, 5, and 6, Nishimura et al discloses a digital data transmission system in which various devices (electronic devices) transmit a variety of data such as NYSC, PAL and MPEG (plurality of communication protocols) connected through a bus (multiplex transmission serial communication line) (column 9, lines 2-15). Nishimura et al further determines the format (frame format) of the data header via format flag(s) that indicate the length of the header (header lengths) (column 5, lines 12-53). The applicant illustrates the difference between protocol A and protocol B as being a difference in the length of the header portion of the data packet, while the payload remains the same in both (applicant figures 2 and 6 as described on pages 13-14 and 19-20).

Response to Arguments

3. Applicant's arguments filed 07/28/2004 have been fully considered but they are not persuasive. Applicant defines a protocol as "a set of convention governing the treatment and especially the formatting of data in an electronic communications system"

Art Unit: 2661

(Remarks 7/28/04, pg 2). The applicant illustrates the difference between protocol A and protocol B as being a difference in the length of the header portion of the data packet, while the payload remains the same in both (applicant figures 2 and 6 as described on pages 13-14 and 19-20). Therefore, a change in header length is a change in protocol.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew W Wahba whose telephone number is (571) 272-3081. The examiner can normally be reached on M-F 8:30-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kenneth N Vanderpuye can be reached on (571) 272-3078. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
